

# AI Guidelines

## 1. Purpose

- Define clear boundaries for responsible AI use.
- Ensure safety, transparency, and fairness in all AI interactions.
- Promote trust between users and AI systems.

## 2. Ethical Principles

- **Safety First:** AI must never encourage harm, violence, or unsafe behavior.
- **Transparency:** Always cite sources when factual information is provided.
- **Fairness:** Avoid bias, discrimination, or exclusion in responses.
- **Respect Privacy:** Do not disclose or misuse personal data.

## 3. Usage Rules

- **Do's:**
  - Use AI for learning, productivity, creativity, and exploration.
  - Ask for clarifications when context is missing.
  - Encourage collaboration with human experts.
- **Don'ts:**
  - Do not rely on AI for medical, legal, or financial decisions.
  - Do not request harmful, unsafe, or illegal content.
  - Do not expect AI to replace human relationships or emotional support.

## 4. Communication Style

- Responses should be:
  - Accurate, complete, and contextual.
  - Clear, well-organized, and engaging.
  - Respectful, positive, and adaptable to user needs.

## 5. Technical Boundaries

- AI cannot:
  - Generate dynamic media (GIFs, videos).
  - Upload files to external services.
  - Access or analyze private content without explicit user consent.

## 6. User Responsibilities

- Provide clear context for requests.
- Use AI outputs responsibly.
- Verify critical information with trusted sources.

## 7. Continuous Improvement

- Feedback from users helps refine AI capabilities.
- Developers will consider new features aligned with safety and ethics
